

## **Learn what influences the cost and How much does hymenoplasty costs.**

Hymenoplasty surgery now become very popular because, in some cultures, a lady must be a virgin before being married. However, a girl may extend her hymen and lose her virginity for several causes, whether intentional or not. Therefore, many women elect to get hymen restoration surgery. The restoration of the hymen for a woman to regain her virginity is known as a hymenoplasty. Women who want to retrieve (or restore) their virginity sometimes want this kind of cosmetic surgery. It is important to know [how much does hymenoplasty cost?](#)

### **The cost of Hymenoplasty**

A hysterectomy is a simple, risk-free treatment that can be completed without an overnight stay. The operation usually lasts 1-2 hours, and the candidate is usually permitted to leave the same day. Hymenoplasty surgery may cost between Rs. 25,000 and Rs. 35,000 in India. Several factors affect the hymenoplasty's overall cost. The elements are listed below. Your choice to have the surgery can be informed if you are aware of these concerns.

- Surgeon's experience and skill
- The cost of hospitalization
- The method utilized to carry out the action
- The kind of anesthesia used
- Added diagnostic procedures
- The location of the clinic or hospital,
- Preoperative consultations and testing,
- Postoperative care,
- The use of specialized surgical equipment or technology

### **Different hymenoplasty surgery components affect the cost in India**

The thin membrane known as the hymen, which partially conceals the vaginal entrance, can be repaired by a procedure called a hymenoplasty. In India, a surgical operation typically includes the following components:

**Exam and consultation:** The surgeon will first examine the patient physically and chat with them to learn about their individual objectives and expectations.

**Anesthesia:** The surgery is often carried out under local anesthesia, although depending on the patient's health and the intricacy of the procedure, some individuals may need general anesthesia.

**Postoperative care:** For good healing and a speedy recovery for the patient, postoperative care guidelines and specific drugs given by the surgeon may be essential.

#### **Does health insurance cover hymenoplasty surgery?**

No, Hymenoplasty is one of those surgical treatments that most health insurance companies do not cover. Many medical insurance plans are constructed in a way that excludes coverage for cosmetic procedures. To find out if your insurance will pay for hymenoplasty surgery and to learn more about the advantages and coverage of your policy, it is important to speak with your insurance company. To fund the entire transaction, you may find some financial institute that can provide a number of additional payment choices for the convenience of the patients.

#### **Conclusion**

The price of hymenoplasty in India can range from Rs. 25,000 and Rs. 35,000. This price difference varies from patient to patient and depends on a number of variables. To discuss the cost of the treatment and look into alternate payment methods, you can speak with an expert and competent surgeon or healthcare professional. It is important to consult with an experienced plastic surgeon before going to the hymenoplasty surgery and make a decision within your budget.
